Erratum to Accompany DIG 2026-0017: List of Selected Oil and Gas Cores with High-Resolution Photographs from the Western Canada Sedimentary Basin in Alberta

Alberta Energy Regulator
Alberta Geological Survey

September, 2026

This dataset was first made available through the AGS Core Data Interactive Map (IAM 014) in 2022. Since then, the Alberta Geological Survey has made updates to the metadata and core photo files for 9 of the 156 photographed cores to correct identified inconsistencies.

The inconsistencies corrected include:

- Duplicate core entries
- Missing links to core photos
- Mismatches between Alberta Township System locations and latitude/longitude coordinates
- Incorrect file names

The following 9 cores have been updated:

- 1AA081208318W500
- 100053407806W400
- 102102108011W600
- 100142908020W600
- 102081804902W400
- 102083604405W500
- 102102705721W400
- 102131406404W600
- 1AA101708215W500

The core masks in the photos for 1AA101708215W500 are erroneously annotated with the UWI 1AA/10-17-082-15W4/00. The correct UWI should be 1AA/10-17-082-15W5/00, as in the core list ("DIG_2026-0017_Core_List.txt") and file names (e.g., "1AA101708215W500_01_647.00-648.63.jpg").
