Price: $3.00

CONTENTS

INDEX TO GEOLOGICAL, BEDROCK TOPOGRAPHY, SOILS, AND GROUNDWATER MAPS OF ALBERTA

INTRODUCTION

The Alberta Research Council; the Geological Survey of Canada (Department of Energy, Mines and Resources, Ottawa); the Research Branch, Canada Department of Agriculture; and the Resource Capability Group, Alberta Energy and Natural Resources are the principal agencies involved in systematically mapping the geology, soils, bedrock topography, and hydrogeology of Alberta. This index outlines the currently available map coverage of the province published by these agencies, and attempts to provide easy reference to that coverage.

The index does not include maps published prior to 1924, for in many cases older maps have been superceded by more recent, more accurate versions. Similarly, maps published after 1924 that have been replaced by more recent publications were deleted, except where the later map is out of print or published at a significantly different scale. Also, a number of maps showing special aspects of outcrop or subsurface bedrock geology, associated in most cases with petroleum exploration or mineral resource studies, have been omitted; information on these maps and related material is available from the Energy Resources Conservation Board (Calgary, Alberta), the Alberta Society of Petroleum Geologists (Calgary, Alberta), and the indexes of various journals.

The Geological Survey of Canada has published six sheets covering Alberta and adjacent areas which provide a comprehensive index to bedrock and surficial geology maps of Alberta available from the Survey. The index sheets are numbered 72, 73, 74, 82, 83, and 84 and can be obtained, together with other information on geological maps and reports published by the Geological Survey of Canada, from:

(1) Geological Survey of Canada
601 Booth Street
Ottawa, Ontario K1A 0E8

(2) Institute of Sedimentary and Petroleum Geology
3303 - 33 Street N.W.
Calgary, Alberta T2L 2A7

For further information on geological, groundwater, bedrock topography, and detailed soils maps and reports published by the Alberta Research Council, write to:

Publications
Alberta Research Council
11315 - 87 Avenue
Edmonton, Alberta T6G 2C2

A free "List of Publications" is available on request.

Exploratory and reconnaissance soils maps and reports are printed by the University of Alberta. Copies can be obtained from:

Department of Extension
University of Alberta
Edmonton, Alberta T6G 2G4

ACKNOWLEDGMENTS

G.B. Mellon, former Head of the Geology Division*, Alberta Research Council, provided the original impetus for the report. R. Green, Chief of the Earth Sciences Branch, Alberta Research Council, provided the financial support for the third edition; many thanks to him and his staff of editors. R. Shelford and Z. Nemeth of the Resource Capability Group, Alberta Energy and Natural Resources, provided the information on that agency's surficial deposits and landform map series.

USE OF THE INDEX MAPS

The index maps are essentially self-explanatory. The National Topographic System grid is shown on each map so that an area of interest can be identified quickly. Each index map is accompanied by a numbered legend which gives a description of the map coverage. Areas which have map coverage are numbered on the index map in accordance with corresponding numbers in the legend. The legend is generally chronologically arranged by publication date so that early maps have low index numbers and more recent maps have higher numbers. Where two maps of an area are available, the index map is given the number corresponding to the earliest map published; this map and the later map are then listed in the legend.

To make the index maps more readable and to avoid any ambiguity where map areas overlap or where smaller maps are contained within a larger map, the index number is repeated in two or more corners of the box denoting the map area. A dashed line *within* any numbered box indicates that map coverage is provided by separate adjacent sheets within the area. Maps covering large areas have a dashed outline in order that they may be distinguished from multiple maps covering part or all the same area. Dashed lines are also used for segments of map areas that extend beyond Alberta's boundaries.

Maps referred to as "Open File" or "Open File No.__" indicate that the map and associated information has not been published but may be viewed, usually by appointment, at the library

*Now Deputy Minister, Non-Renewable Resources, Alberta Energy and Natural Resources.

of the agency which produced the information. Alberta Research Council open file information may be viewed at:

ABBREVIATIONS

The Alberta Research Council (A.R.C.) has been called "The Research Council of Alberta" (R.C.A.) and "Alberta Research" (A.R.). At present the title "Alberta Research Council" is in use but all these names and acronyms are synonymous. In order to avoid confusion when publications are requested, the maps and publications listed in this index retain their original title (for example, Research Council of Alberta Report 65-2, Alberta Research Council Bulletin 32).

Geological Survey of Canada publications occasionally have the abbreviation G.S.C.

INDEX MAPS

BEDROCK GEOLOGY

Bedrock geology maps show the distribution, lithology, age, and structure (attitude) of rock formations at or near the surface. In Alberta these rock units or formations range in age and composition from ancient Precambrian crystalline rocks (Canadian Shield) in the northeast corner of the province to nearly flat-lying Tertiary sandstones and shales in the west-central and southwest Plains. The Rocky Mountains and Foothills are underlain by complexly faulted and folded sedimentary strata ranging in age from Precambrian to Tertiary.

Bedrock formations are covered in most parts of Alberta, especially the Plains, by unconsolidated surficial deposits of glacial (Pleistocene) and postglacial origins ranging in thickness from a few metres to several hundred metres. Consequently, most bedrock geology maps generally show formation boundaries *projected* to the surface rather than to the actual bedrock-glacial drift contact; that is, the maps assume that surficial deposits are thin or absent over much or all of the area under consideration. This assumption can lead to some problems in map interpretation where surficial deposits are thick and the underlying bedrock topography is complex.

The distribution of major bedrock formations in Alberta is summarized on a scale of 1 inch = 20 miles in the Geological Map of Alberta, published in 1972 by the Alberta Research Council (see item 19 below).

Number on index map	Description
1	Geological map, Rosebud and Red Deer sheets; J.A. Allan and J.O.G. Sanderson, 1947. Scale 1 inch = 4 miles. Accompanies R.C.A. Report 13 as Map 9A.
2	Coal occurrences, Wapiti-Cutbank area; J.A. Allan and J.L. Carr, 1946. Scale 1 inch = 3 miles (approx.). Accompanies R.C.A. Report 48 as Map 19.
3	Geological map, Highwood-Elbow area; J.A. Allan and J.L. Carr, 1947. Scale 1 inch = 1 mile. Accompanies R.C.A. Report 49 as Map 20.
4	Ribbon Creek area; M.B.B. Crockford, 1949. Scale 1 inch = 1 mile. Accompanies R.C.A. Report 52 as Map 21.
5	Carbondale River area; W.H.A. Clow and M.B.B. Crockford, 1950. Scale 1 inch = 1 mile. Accompanies R.C.A. Report 59 as Map 22.
6	Elkwater Lake area; M.B.B. Crockford, 1951. Scale 1 inch = 1 mile. Accompanies R.C.A. Report 61 as Map 23.
7	Geology of McMurray area, Alberta; M.A. Carrigy and G.A. Collins, 1959. Scale 1 inch = 4 miles. Accompanies R.C.A. Memoir 1 as Map 26.
8	Geology of Andrew Lake, north district, Alberta; J.D. Godfrey, 1960. Scale 1 inch = 1/2 mile. Accompanies R.C.A. Report 58-3 as Map 58-3A.
9	Geology of the Chinchaga River and Clear Hills (north half) map areas, Alberta; R. Green and G.B. Mellon, 1962. Scale 1 inch = 8 miles. Accompanies R.C.A. Report 62-8.
10	Geology of Andrew Lake, south district; J.D. Godfrey, 1963. Scale 1 inch = 1/2 mile. Accompanies R.C.A. Report 61-2 as Map 61-2A.
11	Geology of the St. Agnes Lake district; J.D. Godfrey and E.W. Peikert, 1963. Scale 1 inch = 1/2 mile. Accompanies R.C.A. Report 62-1 as Map 62-1A.
12	Geology of the Colin Lake district; J.D. Godfrey and E.W. Peikert, 1964. Scale 1 inch = 1/2 mile. Accompanies R.C.A. Report 62-2 as Map 62-2A.

Bedrock Geology - Alberta Research Council (continued)

Number on index map	Description
13	Geology of Bayonet Lake district; Charles Lake, north district; Ashton Lake district; Charles Lake, central district; Potts Lake district; and Charles Lake, south district; J.D. Godfrey, 1966. Scale 1 inch = 1/2 mile. Accompanies R.C.A. Report 65-6 as Maps 65-6A to 6F respectively.
14	Bedrock geology of the Peace River district, Alberta; J.F. Jones and R. Green, 1966. Scale 1 inch = 8 miles. Accompanies R.C.A. Bulletin 16 as Map 27.
15	Jasper and vicinity; Geikie Siding; H.A.K. Charlesworth *et al.*, 1967. Scale 1 inch = 1/4 mile. Accompanies R.C.A. Bulletin 23 as Maps 30 and 31 respectively.
16	Bedrock geology of northern Alberta; R. Green, M.A. Carrigy, and G.B. Mellon, 1970. Scale 1:500,000.
17	Geology of the Marguerite River district, Alberta; J.D. Godfrey, 1970. Scale 1 inch = 1 mile.
18	Bedrock geology, northwest-central Alberta; J.W. Kramers and G.B. Mellon, 1972. Scale 1 inch = 24 miles (approx.). In R.C.A. Information Series No. 60, pp. 109-124.
19	Geological map of Alberta; R. Green, 1972. Scale 1 inch = 20 miles.
20	Bedrock geology of the Fort Chipewyan district, Alberta; J.D. Godfrey. Scale 1 inch = 1/2 mile. (in press)
21	Bedrock geology, Wylie Lake district; J.D. Godfrey *et al.* Scale 1 inch = 1/2 mile. (in preparation)
22	Bedrock geology, Alexander Lake district; J.D. Godfrey *et al.*, 1978. Scale 1 inch = 1/2 mile.
23	Bedrock geology, Ryan Lake district; J.D. Godfrey *et al.* Scale 1 inch = 1/2 mile. (in preparation)

Bedrock Geology - Alberta Research Council (continued)

Number on index map	Description
24	Bedrock geology, Fletcher Lake district; J.D. Godfrey *et al.* Scale 1 inch = 1/2 mile. (in preparation)
25	Bedrock geology, Bocquene Lake district; J.D. Godfrey *et al.* Scale 1 inch = 1/2 mile. (in preparation)
26	Bedrock geology, Turtle Lake district; J.D. Godfrey *et al.* Scale 1 inch = 1/2 mile. (in preparation)
27	Bedrock geology, South Fitzgerald district; J.D. Godfrey *et al.* Scale 1 inch = 1/2 mile. (in preparation)
28	Bedrock geology, Myers Lake district; J.D. Godfrey *et al.* Scale 1 inch = 1/2 mile. (in preparation)
29	Bedrock geology, Daly Lake district; J.D. Godfrey *et al.* Scale 1 inch = 1/2 mile. (in preparation)
30	Bedrock geology, North Fitzgerald district; J.D. Godfrey *et al.* Scale 1 inch = 1/2 mile. (in preparation)
31	Bedrock geology, Tulip Lake district; J.D. Godfrey *et al.* Scale 1 inch = 1/2 mile. (in preparation)
32	Bedrock geology, Mercredi Lake district; J.D. Godfrey *et al.* Scale 1 inch = 1/2 mile. (in preparation)

Bedrock Geology - Geological Survey of Canada

Number on index map	Description
1	Mountain Park; B.R. MacKay, 1929. Map 208A, scale 1 inch = 1 mile. See also No. 127.
2	Cadomin; B.R. MacKay, 1929. Map 209A, scale 1 inch = 1 mile. See also No. 123.
3	Turner Valley; G.S. Hume, 1931. Map 257A, scale 1 inch = 1 mile. See also No. 152.
4	Turner Valley (southwest quarter); G.S. Hume, 1931. Map 261A, scale 1 inch = 1/2 mile. See also No. 152.
5	Turner Valley (northwest quarter); G.S. Hume, 1931. Map 262A, scale 1 inch = 1/2 mile. See also No. 152.
6	Jumpingpound Creek (east half); N.C. Ollerenshaw, 1976. Map 1419A, scale 1:50,000.
6	Jumpingpound Creek (west half); N.C. Ollerenshaw, 1976. Map 1420A, scale 1:50,000.
7	Canmore, north portion; B.R. MacKay, 1935. Map 322A, scale 1 inch = 800 feet.
8	Canmore, south portion; B.R. MacKay, 1935. Map 323A, scale 1 inch = 800 feet.
9	Wildcat Hills, (northwest quarter); G.S. Hume, 1936. Map 325A, scale 1 inch = 1/2 mile. Accompanies G.S.C. Memoir 188.
10	Wildcat Hills (southwest quarter); G.S. Hume, 1936. Map 326A, scale 1 inch = 1/2 mile. Accompanies G.S.C. Memoir 188.
9, 10	Wildcat Hills (west half); N.C. Ollerenshaw, 1972. Map 1351A, scale 1:50,000.
11	Hardisty; P.S. Warren and G.S. Hume, 1937. Map 502A, scale 1 inch = 4 miles.
12	Del Bonita area; L.S. Russell, 1937. Map 37-10, scale 1 inch = 1/2 mile.

Bedrock Geology - Geological Survey of Canada (continued)

Number on index map	Description
13	Taber district; L.S. Russell and J.C. Sproule, 1937. Map 37-14, scale 1 inch = 1 mile.
14	Ribstone Creek; P.S. Warren and G.S. Hume, 1939. Map 501A, scale 1 inch = 4 miles.
15	Stettler; R.L. Rutherford, 1939. Map 503A, scale 1 inch = 4 miles.
16	Red Deer; R.L. Rutherford, 1939. Map 504A, scale 1 inch = 4 miles.
17	Tofield; R.L. Rutherford, 1939. Map 505A, scale 1 inch = 4 miles.
18	Edmonton; R.L. Rutherford, 1939. Map 506A, scale 1 inch = 4 miles.
19	Fallentimber (east half); B.R. MacKay, 1939. Map 548A, scale 1 inch = 4 miles.
20	Fallentimber (west half); B.R. MacKay, 1939. Map 549A, scale 1 inch = 1 mile.
19, 20	Fallentimber Creek; N.C. Ollerenshaw, 1974. Map 1387A, scale 1:50,000.
21	Taber; L.S. Russell, 1940. Map 565A, scale 1 inch = 4 miles. Accompanies G.S.C. Memoir 221.
22	Foremost; L.S. Russell, 1940. Map 566A, scale 1 inch = 4 miles. Accompanies G.S.C. Memoir 221.
23	Dunmore; L.S. Russell, 1940. Map 567A, scale 1 inch = 4 miles. Accompanies G.S.C. Memoir 221.
24	Midnapore; G.S. Hume, 1940. Map 606A, scale 1 inch = 4 miles. See also No. 149.
25	Wapiabi Creek; B.R. MacKay, 1940. Map 40-13, scale 1 inch = 1/2 mile.
26	Grave Flats; B.R. MacKay, 1940. Map 40-15, scale 1 inch = 1/2 mile. See also No. 128.

Bedrock Geology - Geological Survey of Canada (continued)

Number on index map	Description
27	Pembina Forks; B.R. MacKay, 1940. Map 40-16, scale 1 inch = 1/2 mile. See also No. 128.
28	Wildcat Hills (east half); G.S. Hume and C.O. Hage, 1941. Map 652A, scale 1 inch = 1 mile.
29	Fish Creek; G.S. Hume, 1941. Map 667A, scale 1 inch = 1 mile. See also No. 149.
30	Bragg Creek; G.S. Hume and H.H. Beach, 1942. Map 654A, scale 1 inch = 1 mile. See also No. 148.
31	Bearberry; H.H. Beach, 1942. Map 670A, scale 1 inch = 1 mile.
32	Kitscoty; C.H. Crickmay, G.S. Hume and C.O. Hage, 1942. Map 673A, scale 1 inch = 4 miles. Accompanies G.S.C. Memoir 232.
33	Innisfree; C.H. Crickmay, G.S. Hume and C.O. Hage, 1942. Map 674A, scale 1 inch = 4 miles. Accompanies G.S.C. Memoir 232.
34	Moose Mountain; H.H. Beach, 1942. Map 688A, scale 1 inch = 1 mile. Accompanies G.S.C. Memoir 236. See also No. 148.
35	Brooks; J.S. Stewart, 1942. Map 695A, scale 1 inch = 4 miles.
36	Redcliff; J.S. Stewart, 1942. Map 696A, scale 1 inch = 4 miles.
37	Pekisko Creek; G.S. Hume and C.O. Hage, 1942. Map 698A, scale 1 inch = 1 mile. See also No. 154.
38	Marble Mountain; N.C. Ollerenshaw, 1970. Map 7-1969, scale 1:50,000.
39	Beaver Mines; C.O. Hage, 1943. Map 739A, scale 1 inch = 1 mile.
40	Bassano; J.S. Stewart, 1943. Map 741A, scale 1 inch = 4 miles.
41	Sexsmith-Bison Lake districts; L.S. Russell, 1943. Preliminary map, scale 1 inch = 4 miles. G.S.C. Miscellaneous publication.

Bedrock Geology - Geological Survey of Canada (continued)

Number on index map	Description
42	Foothills belt, central Alberta; B.R. MacKay, 1943. Map 43-3, scale 1 inch = 2 miles.
43	Wawa Creek; B.R. MacKay, 1943. Map 43-10, scale 1 inch = 1/2 mile.
44	Athabasca-Barrhead districts; M. Feniak, 1944. Map 44-6, scale 1 inch = 4 miles.
45	Pouce Coupé-Peace River districts; C.H. Crickmay, 1944. Map 44-31, scale 1 inch = 2 miles.
46	Cowley; C.O. Hage, 1945. Map 816A, scale 1 inch = 1 mile.
47	Pedley; E.J.W. Irish, 1945. Map 838A, scale 1 inch = 1 mile.
48	Tay River; J.F. Henderson, 1945. Map 840A, scale 1 inch = 1 mile.
49	Dyson Creek; C.O. Hage, 1946. Map 827A, scale 1 inch = 1 mile. See also No. 151.
50	Entrance; A.H. Lang, 1946. Map 843A, scale 1 inch = 1 mile. Accompanies G.S.C. Memoir 224.
51	Fall Creek; J.F. Henderson, 1946. Map 883A, scale 1 inch = 1 mile.
52	Cripple Creek; O.A. Erdman, 1946. Map 46-22, scale 1 inch = 1/2 mile.
53	Alexo; G.P. Crombie and O.A. Erdman, 1947. Map 884A, scale 1 inch = 1 mile. Accompanies G.S.C. Memoir 254.
54	Saunders; O.A. Erdman, 1947. Map 885A, scale 1 inch = 1 mile. Accompanies G.S.C. Memoir 254.
55	Gregg Lake; E.J.W. Irish, 1947. Map 899A, scale 1 inch = 1 mile.
56	Brûlé; A.H. Lang, 1947. Map 905A, scale 1 inch = 1 mile. Accompanies G.S.C. Memoir 244.

Bedrock Geology - Geological Survey of Canada (continued)

Number on index map	Description
57	Stimson Creek (east half); G.S. Hume, 1949. Map 934A, scale 1 inch = 1 mile. See also No. 154.
58	Moberly Creek; A.H. Lang, 1949. Map 963A, scale 1 inch = 1 mile.
59	Moon Creek; E.J.W. Irish, 1949. Map 968A, scale 1 inch = 1 mile.
60	Gap; R.J.W. Douglas, 1949. Map 978A, scale 1 inch = 1 mile. Accompanies G.S.C. Memoir 255.
61	Langford Creek; R.J.W. Douglas, 1949. Map 981A, scale 1 inch = 1 mile. Accompanies G.S.C. Memoir 255.
62	Callum Creek; G. Shaw and R.J.W. Douglas, 1949. Map 982A, scale 1 inch = 1 mile. Accompanies G.S.C. Memoir 255.
63	Cardston; E.P. Williams, 1949. Map 49-3, scale 1 inch = 1/2 mile.
64	Pierre Greys Lakes; A.H. Lang and E.J.W. Irish, 1951. Map 996A, scale 1 inch = 1 mile. Accompanies G.S.C. Memoir 258.
65	Pincher Creek; R.J.W. Douglas, 1951. Map 51-22, scale 1:40,000.
66	Waterton; R.J.W. Douglas, 1952. Map 52-10, scale 1 inch = 3/4 mile.
67	Copton Creek; E.J.W. Irish, 1954. Map 1041A, scale 1 inch = 1 mile.
68	Two Lakes; H.R. Greiner, 1955. Map 55-14, scale 1 inch = 1 mile.
69	Blairmore; D.K. Norris, 1955. Map 55-18, scale 1 inch = 1 mile.
70	Nordegg; B.R. MacKay and R.J.W. Douglas, 1956. Map 55-34, scale 1 inch = 1 mile.
71	George Creek (east half); R.J.W. Douglas, 1956. Map 55-39, scale 1 inch = 1 mile.

Bedrock Geology - Geological Survey of Canada (continued)

Number on index map	Description
72	Grande Cache; E.J.W. Irish and R. Thorsteinsson, 1957. Map 1049A, scale 1 inch = 1 mile.
73	Mount Head; R.J.W. Douglas, 1958. Map 1052A, scale 1 inch = 1 mile. Accompanies G.S.C. Memoir 291.
74	Chungo Creek; R.J.W. Douglas, 1958. Map 58-3, scale 1 inch = 1 mile.
75	Beehive Mountain; D.K. Norris, 1958. Map 58-5, scale 1 inch = 1 mile.
76	Livingstone River; D.K. Norris, 1958. Map 5-1958, scale 1 inch = 1 mile.
77	Carbondale River; D.K. Norris, 1959. Map 5-1959, scale 1 inch = 1 mile.
78	Miette; E.W. Mountjoy, 1960. Map 40-1959, scale 1 inch = 1 mile.
79	Smoky and Pine Rivers areas; D.F. Stott, 1960. Map 21-1960, scale 1 inch = 4 miles. Accompanies G.S.C. Paper 60-16.
80	Fort Fitzgerald district; G.C. Riley, 1960. Map 12-1960, scale 1 inch = 4 miles.
81	Devonian strata in northeastern Alberta and northwestern Saskatchewan; A.W. Norris, 1960. Accompanies G.S.C. Memoir 313 as Figure 3, scale 1 inch = 12 miles.
82	Firebag River district; L.P. Tremblay, 1961. Map 16-1961, scale 1 inch = 4 miles.
83	Fernie (east half); R.A. Price, 1962. Map 35-1961, scale 1 inch = 2 miles. Accompanies G.S.C. Paper 61-24.
84	Mount Robson; E.W. Mountjoy, 1964. Map 47-1963, scale 1 inch = 2 miles.
85	Adams Lookout; E.J.W. Irish and J.K. Eccles, 1964. Map 1104A, scale 1 inch = 1 mile.

Bedrock Geology - Geological Survey of Canada (continued)

Number on index map	Description
86	Limestone Mountain; N.C. Ollerenshaw, 1969. Map 8-1968, scale 1:50,000. Accompanies G.S.C. Paper 68-24.
87	Rocky Mountain Foothills, latitudes 53°30' and 54°15' (sheet 1); E.J.W. Irish, 1965. Map 1139A, scale 1 inch = 2 miles. Accompanies G.S.C. Memoir 334.
88	Rocky Mountain Foothills, latitudes 53°15' and 53°45' (sheet 2); E.J.W. Irish, 1965. Map 1140A, scale 1 inch = 2 miles. Accompanies G.S.C. Memoir 334.

SURFICIAL GEOLOGY

Surficial geology maps show the types, distribution, and origin of the unconsolidated materials which overlie the bedrock in most parts of Alberta. Much of this material consists of sediments of glacial or proglacial origin (drift) deposited during or shortly after the melting of the mountain glaciers and the large continental ice sheet which covered most of the province during Pleistocene time. These deposits include till, outwash sand and gravel, lake sediments, and eolian sand dunes; their thickness varies and may be as great as 100 metres in some areas.

Other types of surficial deposits are recent (postglacial) sediments deposited in streams and rivers (alluvium), in lakes and sloughs, and in the modern deltas of the Peace and Athabasca rivers in northeastern Alberta. Scattered deposits of preglacial sands and gravels are found beneath the glacial drift in various parts of the province, and many of the higher slopes and ridges in the Rocky Mountains and Foothills are covered by a thin veneer of weathered bedrock rubble and soil called colluvium.

Maps showing the gross thicknesses of surficial deposits for many parts of the Plains are published with the Bedrock Topography Series, described later in the index.

The Resource Capability Group, Alberta Energy and Natural Resources, is preparing a series of maps at 1:63,360 scale (forestry plannimetric series base maps) which delineate landforms, surficial deposits (soil parent material), soil texture, and slope. The maps are prepared by various authors and provide useful detailed information. These maps are *not* published information at present, but they may be *viewed by appointment* with the Resource Capability Group. No index is provided for this series of maps as they are as yet unpublished. Areas of interest may be referred to by using the National Topographic System grid provided by the base map. Considerable information in related environmental fields (forest capability, agricultural lands and so on) may be obtained from data banks established by various departments of the Provincial Government.

ALBERTA ENERGY AND NATURAL RESOURCES,
RESOURCE CAPABILITY GROUP

BEDROCK TOPOGRAPHY

This series of maps shows the topography of the bedrock surface, which in most parts of Alberta is covered by unconsolidated glacial and postglacial deposits to depths ranging from less than a metre up to about a hundred metres. The newer series of maps (beginning with item 9 below) has adopted a standard scale and format which shows, in addition to bedrock topography, the thickness of surficial deposits (drift) overlying bedrock, and the thalwegs of buried valleys developed on the bedrock surface prior to glaciation.

Bedrock topography and drift thickness maps have a number of practical applications involving exploration for mineral resources, groundwater aquifers, interpretation of geophysical data, and the planning of certain types of engineering projects.

For those areas where bedrock topography maps are not available, considerable information may be obtained from the hydrogeological map for the area (if available). (See section on Hydrogeological Maps.)

20c	Bedrock topography, Edmonton area (S.W. segment); W. Ceroici. Scale 1:125,000. (in preparation)
20d	Bedrock topography, Edmonton area (S.E. segment); V.A. Carlson and R. Stein. Scale 1:125,000. (in preparation)
21	Bedrock topography, Grande Prairie; V.A. Carlson and D. Hackbarth, 1974. Scale 1:250,000.
22	Bedrock topography and preglacial thalwegs in the Edmonton area; C.P. Kathol and R.A. McPherson, 1975. Scale 1:50,000. Figure 20 *in* A.R.C. Bulletin 32.
23	Bedrock topography, Lesser Slave Lake area; R.I.J. Vogwill. Scale 1:250,000.
24	Bedrock topography, Athabasca oil sands potential mining area; R.A. McPherson and C.P. Kathol, 1977. Scale 1:125,000. Open File No. 1977-4.

SOILS MAPS

Soil is a mixture of weathered rock or sediment and organic matter formed by physical, chemical, and biological processes operating in the uppermost layer of the earth's surface. The type of soil formed depends on composition of the parent material, climate, vegetation, drainage, and the amount of time during which soil-forming processes have operated. Soils are classified according to the nature of their vertical profile: with depth soils change, and soils generally have more or less distinct horizons which reflect any changes. The sequence and properties (color, texture, and structure) of these horizons define soil type.

In Alberta, soils have been mapped at successively larger scales as the demand for more detailed information has developed. Exploratory surveys, carried out in the less populous northern and west-central parts of the province, involve cursory inspections of large areas and provide broad regional classifications of soil types. Reconnaissance surveys provide relatively detailed information for large areas, and detailed surveys provide precise information for selected smaller areas. Although the main objective of soil surveys in Alberta has been to outline and classify land for agricultural purposes, the maps provide information useful to planners of urban or parks development, managers of forest resources, scientists studying land reclamation, and anyone who needs to know more about Alberta's soil resources.

Exploratory Soil Surveys - Alberta Research Council

Number on index map	Description
1	Exploratory soil survey of 84-C (east half), 84-B, 84-A, and 74-D; J.D. Lindsay, P.K. Heringa, S. Pawluk and W. Odynsky, 1957. Scale 1 inch = 12 miles. Accompanies R.C.A. Preliminary Soil Survey Report 58-1.
2	Exploratory soil survey of 84-D (north half), 84-E, 84-F, and 84-G; J.D. Lindsay, S. Pawluk and W. Odynsky, 1958. Scale 1 inch = 12 miles. Accompanies R.C.A. Preliminary Soil Survey Report 59-1.
3	Exploratory soil survey of 84-J, 84-K, and 84-L; J.D. Lindsay, S. Pawluk and W. Odynsky, 1959. Scale 1 inch = 12 miles. Accompanies R.C.A. Preliminary Soil Survey Report 60-1.
4	Exploratory soil survey of 84-M, 84-N, and 84-O; J.D. Lindsay, S. Pawluk and W. Odynsky, 1960. Scale 1 inch = 12 miles. Accompanies R.C.A. Preliminary Soil Survey Report 61-1.
5	Exploratory soil survey of 84-P, 84-I, and 84-H; J.D. Lindsay, S. Pawluk and W. Odynsky, 1961. Scale 1 inch = 12 miles. Accompanies R.C.A. Preliminary Soil Survey Report 62-1.
6*	Exploratory soil survey of 74-M, 74-L, 74-E, and 73-L (north half); J.D. Lindsay, S. Pawluk and W. Odynsky, 1962. Scale 1 inch = 12 miles. Accompanies R.C.A. Preliminary Soil Survey Report 63-1.
7	Exploratory soil survey of 83-O, 83-P, and 73-M; A. Wynnyk, J.D. Lindsay, P.K. Heringa and W. Odynsky, 1963. Scale 1 inch = 12 miles. Accompanies R.C.A. Preliminary Soil Survey Report 64-1.
8	Exploratory soil survey of 83-L, 83-K, 83-F, and 83-J; J.D. Lindsay, A. Wynnyk and W. Odynsky, 1963. Scale 1 inch = 12 miles. Accompanies R.C.A. Preliminary Soil Survey Report 64-2.

HYDROGEOLOGY

Hydrogeological maps display information pertaining to the distribution, amounts, and quality of groundwater contained in the surficial deposits and bedrock formations of an area. Such maps contain a geological framework (showing the lithology and areal distribution of bedrock formations and surficial deposits) upon which various physical and chemical properties of groundwater supplies are superimposed.

The Alberta Research Council has published a number of maps and reports describing selected aspects of groundwater resources for different parts of the province. The most recent set of maps forms part of the hydrogeological reconnaissance map series and shows groundwater probabilities (expected average yields of wells drilled in areas under consideration), chemistry, and certain aspects of flow systems for map areas delineated by the National Topographic Series (NTS). Most of the maps are published on a scale of 1:250,000 and are compiled from data plotted on NTS maps at scales of 1:50,000 or 1:63,360. The latter maps form the working bases for compilation of the basic water well information for Alberta and may be inspected in the offices of the Groundwater Division, 3rd Floor, Campus Towers, 8625 - 112 Street, Edmonton, Alberta, Canada, T6G 1K8.

To assist the map user, the Alberta Research Council has prepared a legend and guide to interpreting the hydrogeological maps. This report, Earth Sciences Report 72-12; *A Legend and Guide for the Preparation and Use of the Alberta Hydrogeological Information and Reconnaissance Map Series,* is available from Publications, Alberta Research Council Library.

3	Hydrogeology, Rocky Mountain House; O. Tokarsky, 1971. Scale 1:250,000. Accompanies R.C.A. Earth Sciences Report 71-3.
4	Hydrogeology, Drumheller; D. Borneuf, 1972. Scale 1:250,000. Accompanies R.C.A. Earth Sciences Report 72-1.
5	Hydrogeology, Wabamun; G.F. Ozoray, 1972. Scale 1:250,000. Accompanies R.C.A. Earth Sciences Report 72-8.
6	Hydrogeology, Mount Watt; O. Tokarsky, 1972. Scale 1:250,000. Accompanies R.C.A. Earth Sciences Report 72-3.
7	Hydrogeology, Bison Lake; O. Tokarsky, 1972. Scale 1:250,000. Accompanies R.C.A. Earth Sciences Report 72-2.
8	Hydrogeology, Tawatinaw; D.M. Borneuf, 1973. Scale 1:250,000. Accompanies R.C.A. Earth Sciences Report 72-11.
9	Hydrogeology, Gleichen; G.F. Ozoray and A.T. Lytviak, 1974. Scale 1:250,000. Accompanies A.R. Earth Sciences Report 74-9.
10	Hydrogeology, Lethbridge-Fernie; O. Tokarsky, 1974. Scale 1:250,000. Accompanies A.R. Earth Sciences Report 74-1.
11	Hydrogeology, Medicine Hat; D.R. Stevenson and D.M. Borneuf. 1977. Scale 1:250,000. Accompanies A.R.C. Earth Sciences Report 75-2.
12	Hydrogeology, Oyen; D.M. Borneuf. Scale 1:250,000. Accompanies A.R.C. Earth Sciences Report 77-5. (in preparation)
13	Hydrogeology, Vermilion; D.V. Currie and N. Zacharko, 1975. Scale 1:250,000. Accompanies A.R.C. Earth Sciences Report 75-5.

Hydrogeological Map Series - Alberta Research Council (continued)

Number on index map	Description
14	Hydrogeology, Iosegun; O. Tokarsky, 1977. Scale 1:250,000. Accompanies A.R.C. Earth Sciences Report 76-2.
15	Hydrogeology, Whitecourt; O. Tokarsky, 1977. Scale 1:250,000. Accompanies A.R.C. Earth Sciences Report 76-3.
16	Hydrogeology, Waterways-Winefred Lake; G.F. Ozoray, 1975. Scale 1:500,000. Accompanies A.R.C. Earth Sciences Report 74-2.
17	Hydrogeology, Foremost; D.M. Borneuf, 1976. Scale 1:250,000. Accompanies A.R.C. Earth Sciences Report 74-4.
18	Hydrogeology, Wainwright; D.A. Hackbarth, 1976. Scale 1:250,000. Accompanies A.R.C. Earth Sciences Report 75-1.
19	Hydrogeology, Calgary-Golden; G.F. Ozoray and R. Barnes. 1978. Scale 1:250,000. Accompanies A.R.C. Earth Sciences Report 77-2.
20a	Hydrogeology, Edmonton (N.W. segment of NTS 83H); R. Bibby, 1974. Scale 1:125,000. Accompanies A.R. Earth Sciences Report 74-10.
20b	Hydrogeology, Edmonton (N.E. segment of NTS 83H); R. Stein, 1976. Scale 1:125,000. Accompanies A.R.C. Earth Sciences Report 76-1.
20c	Hydrogeology, Edmonton (S.E. segment of NTS 83H); R. Stein. Scale 1:125,000. (in preparation)
20d	Hydrogeology, Edmonton (S.W. segment of NTS 83H); W. Ceroici. Scale 1:125,000. (in preparation)
21	Hydrogeology, Peace River; D.M. Borneuf. Scale 1:250,000. (in preparation)
22	Hydrogeology, Winagami; D.M. Borneuf. Scale 1:250,000. (in preparation)
23	Hydrogeology, Grande Prairie; D.A. Hackbarth. Scale 1:250,000. Accompanies A.R.C. Earth Sciences Report 76-4. (in preparation)
24	Hydrogeology, Bitumount and Namur Lake; G.F. Ozoray, A.T. Lytviak, and D.A. Hackbarth. Scale 1:500,000. (in preparation)

Hydrogeological Map Series - Alberta Research Council (continued)

Number on index map	Description
25	Hydrogeology, Sand River; G.F. Ozoray and A.T. Lytviak. Scale 1:250,000. (in preparation)
26	Hydrogeology, Lesser Slave Lake; R.I.J. Vogwill. Scale 1:250,000. Accompanies A.R.C. Earth Sciences Report 77-1. (in preparation)
27	Hydrogeology, Edson; R.I.J. Vogwill. Scale 1:250,000. (in preparation)
28	Hydrogeology, Pelican and Algar Lake; G.F. Ozoray and A.T. Lytviak. Scale 1:500,000. (in preparation)
29	Hydrogeology, Kananaskis Lakes; D.M. Borneuf. Scale 1:250,000. (in preparation)
30	Hydrogeology, Mount Robson and Wapiti; R. Barnes, 1977. Scale 1:500,000. Accompanies A.R.C. Earth Sciences Report 76-5.
31	Hydrogeology, Brazeau and Canoe River; R. Barnes. Scale 1:250,000. Accompanies A.R.C. Earth Sciences Report 77-6. (in preparation)
32	Hydrogeology, Peerless Lake; W. Ceroici. Scale 1:250,000. (in preparation)
33	Hydrogeology, Fort Chipewyan and Lake Claire; A.T. Lytviak. Scale 1:500,000. (in preparation)
34	Hydrogeology, Clear Hills and Chinchaga River. Scale 1:500,000. (in preparation)
35	Hydrogeology, Zama Lake and Bistcho Lake. Scale 1:500,000. (in preparation)
36	Hydrogeology, Wadlin Lake and Vermilion Chutes. Scale 1:500,000. (in preparation)
37	Hydrogeology, Steen River and Whitesand River. Scale 1:500,000. (in preparation)
38	Hydrogeology, Peace Point and Fitzgerald. Scale 1:500,000. (in preparation)

Hydrogeology - Miscellaneous Groundwater Geology and Related Maps

Alberta Research Council

Number on index map	Description
1	Groundwater geology, Beaverlodge district; J.F. Jones, 1959. Scale 1 inch = 2 miles. Accompanies R.C.A. Report 59-2 as map 59-2A.
2	Groundwater geology, Beaverlodge district; J.F. Jones, 1959. Scale 1 inch = 2 miles. Accompanies R.C.A. Report 59-2 as map 59-2B.
3	Piezometric surface, summer 1958, Beaverlodge district; J.F. Jones, 1959. Scale 1 inch = 1.8 miles. Accompanies R.C.A. Report 59-2 as map 59-2C.
4	Milk River Sandstone, southern Alberta (various maps); P. Meyboom, 1960. *In* R.C.A. Memoir 2.
5	Piezometric surface, Pembina district; R.N. Farvolden, 1961. Scale 1 inch = 2.14 miles. Accompanies R.C.A. Report 61-4.
6	Groundwater map, Calgary district; P. Meyboom, 1961. Scale 1:50,000. Accompanies R.C.A. Bulletin 8.
7	Groundwater probability of the bedrock, Oyen; groundwater probability of the drift, Oyen; G.R. Kunkle, 1962. Scale 1 inch = 4 miles. Accompanies R.C.A. Report 62-3.
8	Water well locations, Peace River district; J.F. Jones, 1962. Scale 1 inch = 8 miles. Accompanies R.C.A. Report 62-4.
9	Reconnaissance groundwater study, Swan Hills and adjacent districts; J.F. Jones, 1962. Scale 1 inch = 4 miles. Accompanies R.C.A. Report 62-5.
10	Groundwater geology and hydrogeology of east-central Alberta (various maps); E.G. LeBreton, 1963. *In* R.C.A. Bulletin 13.
11	Piezometric surface, Lloydminster district; E.G. LeBreton, 1963. Scale 1 inch = 2 miles. Accompanies R.C.A. Bulletin 12.

Hydrogeology - Miscellaneous Groundwater Geology and Related Maps
Alberta Research Council (continued)

Number on index map	Description
12	Piezometric surface, Andrew district; E.G. LeBreton, 1963. Scale 1 inch = 1.6 miles. Accompanies R.C.A. Bulletin 12.
13	Olds district, (various maps); J. Tóth, 1966. Accompanies R.C.A. Bulletin 17.
14	Three Hills district, (various maps); J. Tóth, 1968. Accompanies R.C.A. Bulletin 24.
15	Handhills Lake district, (various maps); A. Vanden Berg and D.H. Lennox, 1969. Accompanies R.C.A. Report 69-1.
16	Regional groundwater conditions, Edmonton (N.W. segment of NTS 83H) (various maps); R. Bibby, 1974. Scale 1 inch = 4.8 miles. Accompanies A.R. Report 74-6.
17	Red Deer and vicinity (various maps); G.M. Gabert, 1975. Accompanies A.R.C. Bulletin 31.
18	Regional chemistry, Wainwright area (various maps); D.A. Hackbarth, 1975. Scale 1 inch = 16 miles (approx.). Accompanies A.R.C. Earth Sciences Report 75-6.
19	Tri-Creek Basin (various maps); D.V. Currie, 1976. Accompanies Bulletin 33.
20	Regional groundwater conditions, Grande Prairie-Beaverlodge area (various maps); D.A. Hackbarth. 1978. Accompanies A.R.C. Earth Sciences Report 77-4.
