

LEGEND:

Surficial deposits	
Type	Materials
1. Eolian sand	gravel to clay
2. Alluvium	silt and clay, minor sand
3. Recent lacustrine	silt and clay, minor sand
4. Glaciolacustrine	gravel to clay
5. Glaciofluvial	gravel to clay
6. Glacial till	gravel to clay
7. Colluvium	gravel to clay
8. Organic	
9. Bedrock	
Landforms	
Glacial grooves and ruminoids in drift (ice flow direction known, unknown)	
Glacial grooves and drumlins in rock (ice flow direction known, unknown)	
Abandoned channel (flow direction indicated where known)	
Ill defined channel (from penultimate glaciation?)	
Esker	
Ice-thrust ridges and ridges of uncertain origin	
Maximum extent of glacial lake	
Outwash plains of sand and gravel	
Parabolic dunes with orientation	
High-level record of glaciation (terraces, meltwater channel, or glacial groove, approximate elevation in metres (feet))	
Delta	
Abandoned shoreline	
Floating ice scours (reticulate pattern)	

*Deposit contacts were based mainly upon aerial photograph interpretation and minor field checking during 1985.
