

Date Logged: January 18 & July 26, 1994

Released as part of Appendix 6 in  
AER/AGS Open File Report 2017-08

Logged by: Michelle Atalla; Darvl Wightman; edited by F. J. Hein

Remarks: - located in broad E10 low btwn Grosmont Hlgh & Pz ridge; RMS missing; top 3 boxes poor condition, not described  
- described at ERCB and MCRF; sample portion located @ MCRF, most cut in half with one side v-notched, sampled for palv & sand mineralogy

Picks: Top Wab C (T11) = 359 m; Top Wab D (T10.5) = 363 m; Top McMurray Chnl Seq (E10) = 390 m; Top Lower McMurray Fluvial/Continental Unit (E05) = 403.5 m; sub-Cretaceous unconformity/ Top Paleozoic (Pz) = 407.94 m.

Picks readjusted after palynology done and relogged in 2017. See rec 3.

## AppleCore colour legend

### LITHOLOGY

	SAND/SANDSTONE		SHALEMUDSTONE		organic shale		LIMESTONE
	silty sand		silty shale		coal		Calcareous shale
	shaly sand		sandy shale		breccia		Lost Core
	sandy silt		clay/claystone				

### CONTACTS

	Sharp		Erosional
---	-------	---	-----------

### PHYSICAL STRUCTURES

	Current Ripples		Trough Cross-strat.		Oscillatory Ripples		Planar Tabular Bedding
	High Angle Tabular Bedding		Low Angle Tabular Bedding		Wavy Parallel Bedding		Synaeresis Cracks

### LITHOLOGIC ACCESSORIES

	Silt Lamina		Shale Lamina		Pebbles/Granules		Glauconitic
	Feldspathic		Lithic		Rip Up Clasts		Coal Fragments
	Wood Fragments		S P Salt & Pepper				

### ICHTNOFOSSILS

	Rootlets		Skolithos		Planolites		Gyrolithes
	Diplocraterion		Arenicolites		Escape Trace		Cylindrichnus
	Bergaueria		Asterosoma		Thalassinoides		Chondrites
	Teichichnus		Anconichnus				

# Stratigraphic Nomenclature for Picks

**Definition of stratigraphic markers ('picks') with quality codes**  
(modified from Wynne et al., 1994 and Hein et al., 2000).\*

Pick	Type of Surface	Description	Quality Code**
T21	Transgressive	Wabiskaw Marker Top Wabiskaw Mbr. 'A'	Good - Very Good
T15	Transgressive	Top Wabiskaw Mbr. 'B'	Good - Very Good
E14	Major Erosion	Wabiskaw Internal Incision	Good - Very Good
T11	Transgressive	Base First Regional Marine Shale in the Clearwater Fm. Top Wabiskaw Mbr. 'C'	Very Good-Excellent
T10.5	Transgressive	Top Wabiskaw Mbr. 'D' Incised Valley-Fill Deposit	Excellent-Very Good
E10	Disconformity/ Unconformity	Top Upper McMurray Fm Major Erosion Surface	Excellent -Very Good
E5	Disconformity/ Unconformity	Top Lower McMurray Fm. Major Erosion Surface	Variable Very Poor -Fair
Sub-Cret. (Pal.)	Unconformity	Base of McMurray Fm Major Erosion Surface	Variable Very Good-Excellent (However this is sometimes difficult to pick in areas of significant clastic karst-infill, or where marl is above the sub- Cretaceous unconformity)

\* Abbreviations: Group, Grp.; Formation, Fm.; Member, Mbr.

\*\* Quality Codes are relative: Excellent to Very Good, can be picked on all wire-line logs and seismic; Poor to Very Poor, need to be confirmed by outcrops or core, difficult to pick on wire-line logs, somewhat easier to pick on seismic.
